# **Product information**

## Cera Tec

## PI 57/02/25/2025

## **Description**

Micro ceramic solid lubricant suspension based on hexagonal boron nitride (BN) in selected base oils. The laminar graphite-similar structure reduces friction and wear and prevents direct metal-to-metal contact. The < 0.5  $\mu m$  particle size guarantees optimum filter flow properties and protects against depositing of solid lubricant particles. Miscible with all commercially available motor oils and gear oils.

## **Properties**

- Reduces friction losses in the engine
- Protects the engine in emergency running conditions
- Reduces wear during cold starts and while operating
- increases smooth operation
- highest thermal stability
- excellent high and low temperature behavior
- stable under extreme pressures
- long engine service life
- chemically inert
- miscible with all commercially available motor oils
- compatible with fine filters
- tested for turbochargers and catalytic converters
- suitable for diesel particulate filters

#### **Technical data**

Base	BN micro ceramic
Color / appearance	beige
Particle size	Majority < 0.5 μm
Temperature stability of the	up to 1200 °C

ceramic particles

Density at 20 °C 0,893 g/cm³
DIN 51757

Viscosity at 20 °C ~250 mPas

DIN 51398

Flash point >100 °C DIN ISO 2592

Pour point -20 °C

DIN ISO 3016

Form liquid

Odor characteristic

## Areas of application

For gasoline and diesel engines, manual transmissions, pumps, and compressors. Suitable for toothed belts running in oil. Not suitable for use with wet clutches!

#### **Comment**

Not suitable for use with wet clutches.

#### **Application**

300 ml sufficient for up to 5 l of motor oil. Long-term effect up to 50,000 km. Shake well before use!

#### Available pack sizes

300 ml Bottle aluminum 3721
